### PROFILE

Result-oriented DevOps Engineer with over 12 years of experience in developing and maintaining high-performance web solutions. I excel in Cloud, Containerization, Infrastructure as Code, CI/CD, Centralized Logging, and Monitoring. I am adept at working in multicultural, cross-functional teams and have a strong sense of ownership and organizational skills, making me an effective Lead DevOps Engineer with a keen eye for quality and attention to detail.

### WORK EXPERIENCE

#### Lead Systems Engineer

EPAM Systems | Malaga, Spain

October 2022 – Present

- Led backlog refinement and sprint preparation.
- Conducted thorough peer reviews to ensure the quality and integrity of project deliverables.
- Provided mentorship to team members, fostering their professional growth and development.
- Played a pivotal role in maintaining project focus, and facilitating agile methodologies for effective project execution.

#### Senior Systems Engineer

EPAM Systems | Malaga, Spain

February 2022 – October 2022

- Maintained and updated AWS infrastructure through terraform modules.
- Managed application and infrastructure services using helm templates.

#### Senior DevOps Engineer

HomeStory | Belgrade, Serbia

November 2020 – February 2022

- Wrote Cloud Formation templates for various AWS services.
- CI/CD pipeline management.

#### DevOps Engineer

AVS Solutions | Belgrade, Serbia

April 2019 – November 2020

- Migrated on-premise monolithic application into microservices hosted on Azure and orchestrated by Kubernetes.
- Replaced on-premise BitBucket and Bamboo with GitLab, setting up GitLab build and deployment pipelines for over 50 projects.

#### DevOps Engineer

Levi9 Technology Services | Belgrade, Serbia

May 2018 – April 2019

- Maintained infrastructure with over 1000 servers and 40 environments deployed on AWS, using Puppet for provisioning and configuration.

#### Junior DevOps Engineer

Rabbit Internet | Bangkok, Thailand

January 2017 – April 2018

- Involved in database management, application containerization, Kubernetes management, and Jenkins CI/CD pipelines.

#### Software Engineering Experience

February 2011 – December 2016

Started as a Full-Stack Developer, becoming a Backend PHP Developer, and eventually assuming the role of Lead Backend Engineer across multiple organizations.
